

TECHNICAL SPECIFICATIONS

Part Number: H300 (Rev B)

The H300 is specifically designed to include 3 motions or intentional actions for safe and intentional initiation of TEC Torch cartridges. This unit's thick Nylon shell and filled internal compartments are ideally suited for rugged and harsh environments. The rotating ARMING switch is located at the base with SAFE and FIRE position detents. The push forward FIRE switch is recessed with a sliding cover. Two replaceable CR123A batteries power the H300. The H300 is dust and water resistant.

LOGISTICS

- Weight: 0.55 lb [250 gram]
- N.E.W.: N/A
- Operation:
 1. Cartridge installation serves to hold cartridge in a fixed physical position and complete electric circuit
 2. ARM and FIRE switches allow electrical current to flow into the cartridge
 3. New battery is capable of firing up to four (4) cartridges in parallel
- Interface: Universal front receptacle with coax connector
- Shelf Life: 5 yrs with proper storage (no battery)
- Battery: 2X CR123A
